FaStrip® DE-COATING CABINETS

The Fast, Safe Method for Dry Stripping Parts without Hazardous Chemicals

Dust collector contributes to a clean working environment by capturing fines and other unwanted debris.

Tunable media reclaimer reduces abrasive costs by separating and recovering good abrasives for reuse. Vibrating screen keeps lightweight plastic media moving through reclaim system. Magnetic separator filters damaging ferrous particles.

Automatic Sure-Flo® media regulator, combined with this **MG-78 CR exhaust valve**, helps to assure smooth, consistent abrasive flow.

Kleensweep™ window improves visibility by creating an air stream across viewing window that reduces dust buildup.

Empire's FaStrip® blast cabinets provide a safe, efficient alternative to chemical stripping and cleaning of parts.

Designed specifically for use with plastic media, FaStrip cabinets make it possible to strip metallic or composite materials quickly and thoroughly without adverse effects on substrate surfaces. Materials on which these plastic-media cabinets create the necessary etch for superior bonding of new coatings include Alclad and aluminum anodize, titanium, steel, Kelvar, fiberglass, carbon graphite and magnesium.

Built for non-stop production, Empire's rugged FaStrip cabinets are equipped with a tunable media reclaimer and highly efficient dust collector, which

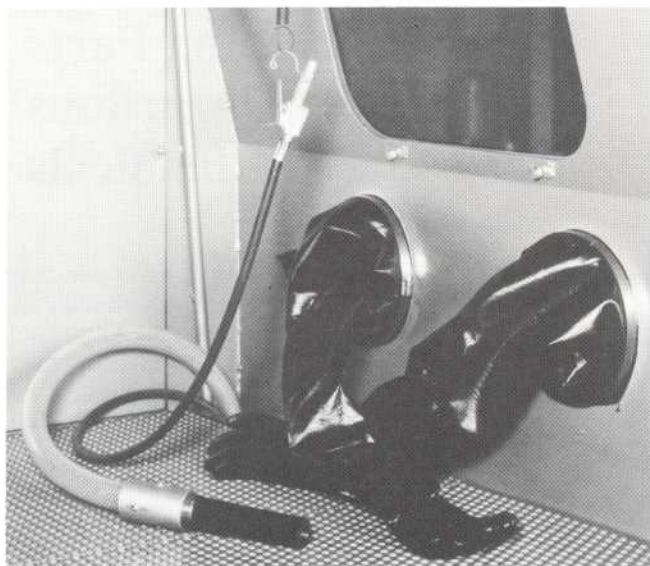

improve finishing results and reduce media costs. These units also incorporate an automatic Sure-Flo® media regulator and vibrating screen within the media reclaimer to assure smooth, trouble-free flow of plastic abrasives. All FaStrip cabinets can be specified with a variety of factory options designed to meet your particular application requirements.

In addition to blast cabinets, Empire's FaStrip plastic-media line includes portable equipment, blast rooms and automated blast systems.

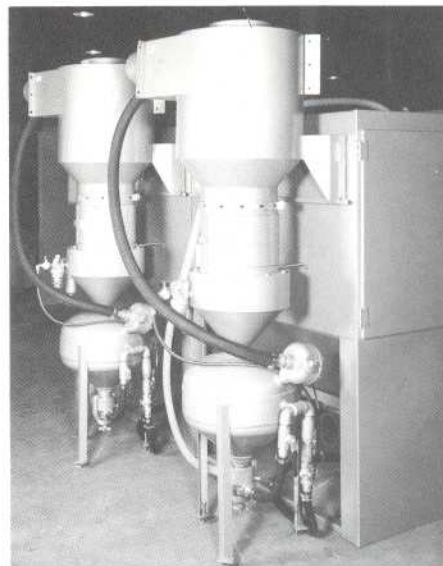

For additional information on our full line of FaStrip products, contact Empire or your local Empire distributor.

FaStrip CABINET SPECIFICATIONS

Model Number	Part Number	Overall Dimensions (DxWxH)	Interior Dimensions (DxWxH)	Door Opening (HxW)	Tunable Reclaimer (CFM)	Fan Motor	Dust Collector	Shipping Weight
FS-3648	103129	38"x54"x72"	36"x48"x36"	32"x29"	600	1 1/2 hp/230V/1 PH	DCM-200	1500 lb
FS-4848	104129	50"x54"x72"	48"x48"x36"	32"x41"	900	2 hp/230V/1 PH	DCM-200A	1650 lb
FS-6060	105129	62"x66"x78"	60"x60"x44"	40"x50"	900	2 hp/230V/1 PH	DCM-200A	1950 lb

The cabinet interior features high-intensity lighting, a venturi blast nozzle with lightweight blast hose, a dust-off gun and abrasion-resistant operator gloves.

(Dual-station cabinet shown)

FaStrip cabinets are equipped with an automatic Sure-Flo media regulator, a MG-78 CR exhaust valve and a vibrating screen within the reclaimer to assure smooth, consistent flow of lightweight plastic abrasives.

STANDARD CABINET FEATURES

- Industrial magnetic particle separator
- Grounding strap on blast hose
- Automatic Sure-Flo media regulator
- MG-78 CR exhaust valve
- Vibrating screen within cyclonic reclaimer
- 3/8" venturi blast nozzle with lightweight blast hose
- Rubber, cloth-lined gloves
- Adjustable floodlights (2 on 3634 & 4848, 3 on 6060)
- Dust-off gun
- Pneumatic foottreadle control
- 14"x22" safety-glass window
- Moisture filter
- Leveling pads
- OSHA door switch
- 14-gauge construction
- 3/16" perforated floor with 1,000-lb capacity
- 1-cu-ft, ASME pressure vessel

FACTORY OPTIONS

- Ergonomically engineered systems
- Dual-station cabinets
- Sight glass for checking media level
- Manual and powered turntables
- Pneumatically powered vertical doors
- Manometer
- Automatic bag shaker for dust collector
- Fan silencer
- Cabinet silencer
- 3-cubic foot vessel for extended blast duration
- Rotating basket attachment for automated parts processing
- Fixed nozzle holder
- Operator static strap
- Conductive safety matting
- Special electricals
- White rubber curtains for improved, long lasting visibility

OTHER EMPIRE PRODUCTS

- FaStrip® portables
- A full range of cabinets-economy to modified
- Automated blast systems
- Blast rooms
- SuperBlast® portables
