

# INDEXING SPINNER HANGER

Viking airless blast, spinner hangers come in a variety of sizes. Rugged, long lasting, industrial equipment that provides versatility in blasting a wide range of part sizes and shapes.

The Spinner Hanger delivers high efficiency with center-fed blast wheels. A cast control cage in the wheel allows for management of the abrasive pattern achieving the highest percentage of shot impact on the work. Viking equipment is designed for ease of maintenance and durability. Viking blast wheels proven reliability and longevity blend well with the heavy-duty construction of the Spinner Hanger.

- 3 Cast lined blast chambers
- Manganese wheel housing and cast liners
- Heavy duty abrasive recycling system
- Twice the horsepower than comparable equipment
- Light curtains standard to provide the highest level of operator safety
- Rugged construction with 25% more weight than comparable equipment
- Multiple Indexing Available
- Low and easy maintenance
- Heavy duty auger system
- Machine warranty
- Pre-wired and tested

It is in the customization of our basic designs to your parts specific needs that truly sets Viking apart from the competition. With an accomplished and proven design staff, Viking can build equipment from the ground up or simply modify existing models to tailor fit your cleaning application. At Viking we do not simply match your part to the closest machine size that will work. We match our blast equipment to your part, to provide the most efficient and economical cleaning solution possible.
