

When high production and superior cleaning are at the top of your priorities list, Viking's Rubber Belt Blasters are the clear choice. Available in standard 1.5, 3, 6, 12, 16 and 20 cubic foot capacities, with custom sizing also available to fit specific applications. These machines are ideal for high speed processing of parts that can be gently tumbled in the blast mill's cushioned rubber cavity.

### STANDARD FEATURES:

- "Viking Guard" belt braking system stops belt rotation in the event of a jam to keep parts from tearing the belt
- Utilizes VK PowerMax high velocity, center-fed blast wheels
- Pneumatic blast cabinet door (Models 600 and 1200 only)
- 5-30, HP blast wheel configurations
- Fully adjustable lip type airwash separator ensures optimal abrasive cleaning

### OPTIONAL FEATURES:

- Dust collection system
- Rotary scalp drum for separating slag, flashing and other large contaminants
- CSA approved UL recognized components
- Auxiliary abrasive hopper and low level sensor
- Take away conveyors
- Loader for loading the blast mill from a floor loaded tote
- Cast chrome drum heads
- Splice belt available for quick change belt replacement for reduced maintenance and down time

It is in the customization of our basic designs to your parts specific needs that truly sets Viking apart from the competition. With an accomplished and proven design staff, Viking can build equipment from the ground up or simply modify existing models to tailor fit your cleaning application. At Viking we do not simply match your part to the closest machine size that will work. We match our blast equipment to your part, to provide the most efficient and economical cleaning solution possible.

Steel Belt Tumble Blast Systems are also available (shown right)
